Furygan

PROTECTIVE
CLOTHING

EDITO

Since 1969

Founded in 1969 by Jacques Segura, the Furygan brand was forged with passion, commitment and a culture of excellence. At the age of 14, Jacques Segura was already working with leather in every way, eager to learn, going from shoes to gloves with the same dexterity as his parents' craftsmanship.

This spirit of innovation, this passion for leather work, this avidity for all the technical and technological advances that can improve the daily life of motorcyclists, but above all this a will to never compromise when dealing with safety, are the fundamentals of the company. These values are perpetuated today by David Segura, his son, who, by initiating the turn to textiles and continuing to modernise the company, has anchored the brand's position. We are bikers, and we are on the front line.

Furygan, today and tomorrow

Our experience is valuable, it shapes the company's culture. With its know-how, Furygan has evolved and refocused on its core business: the development and manufacture of technical clothing for motorised two-wheelers.

Today, Furygan is the leader of the French market and is growing internationally. Furygan is involved in the protection of motorcyclists whatever their riding style, on the road, on the track or off the beaten track.

Technology and know-how

Furygan has been a leather specialist since the beginning and has been present in competitions at the highest level. It has developed while remaining a French and family company. Far from being a handicap, this structure has allowed us to successfully integrate new materials and technologies, or the most recent safety standards.

And our head office, located in Nîmes since the creation of Furygan, is now home to an internal research and development laboratory (the Furygan Motion Lab), it remains above all a real production site, a factory which preserves our most precious heritage: our know-how. We still have a production site in Nîmes. It includes a leather tracing and cutting unit for mass-produced products, as well as a clothing workshop.

The latter allows us to produce all custom-made suits, but also to ensure the prototyping of tomorrow's garments, as well as offering a qualified after-sales service for the repair of your Furygan products.

*At the heart of our factory in Nîmes, this steam dummy is the first link of the finishing chain. By inflating thanks to a steam system under high pressure, it irons the **25,000 leather jackets** that we cut every year.*

To learn more about our history, the brand and the unique know-how of Furygan consult furygan.com

AIRBAG

FURY AIRBAG EVO

SS24

● Black / 7806-1

XS - 4XL

GOOD TO KNOW

- › The lightest electronic airbag on the market.
- › Detection + inflation in less than 0.06s.
- › The only airbag technology with several customised detection modes (road, track, adventure, etc.).
- › Up to 30 hours of continuous use.
- › The new airbag can be triggered 5 times before replacement.
- › Percentage of ventilated surface: 100%.

THE FURY AIRBAG EVO PROTECTS:

- 1 Neck
- 2 Chest
- 3 Spine
- 4 Abdomen

+ L1 back protector included.

A new step in motorcycle protection, the Fury Airbag EVO redefines market standards. Still powered by intelligent, self-learning In&Motion technology, its protection performance has been enhanced by a new inflation pocket. Its featherweight, slimmness and ultra-ventilation make it the benchmark for the market. Active protection that's as discreet as it is high-performance, so you'll forget you're wearing it on the road, trails and circuits.

PROTECTION

In&Motion back protector. Level 1.

ERGONOMICS

Ultra stretchable sides. To allow a perfect fit thanks to its superior elasticity.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

Mesh 3D liner. 3D Mesh limits the creation of a thermal bridge. This ventilated insulation helps maintain a constant temperature inside the garment, whether it is hot or cold outside.

MATERIALS

Mesh.

Airmesh. Three-dimensional synthetic fabric with excellent airflow properties, good cushioning and quick drying capabilities.

D30®. The D30® range of materials includes over 30 different formulations. The polymer blends used in partnership with Furygan offer exceptional impact protection, comfort and flexibility.

FURY AIRBAG EVOLUTION+

SS24

● Black / 7896-1

XS - 4XL

GOOD TO KNOW

- › The lightest electronic airbag on the market.
- › Can be worn under or over your motorbike clothing.
- › Detection + inflation in less than 0.06s.
- › The only airbag technology with several customised detection modes (road, track, adventure, etc.).
- › Up to 30 hours of continuous use.
- › The new airbag can be triggered 5 times before replacement.
- › Percentage of ventilated surface: 100%.

THE FURY AIRBAG EVOLUTION+ PROTECTS:

- 1 Neck
- 2 Chest
- 3 Spine
- 4 Abdomen

+ L2 back protector included.

The Fury Airbag Evolution+ combines all the benefits of the Fury Airbag EVO with the Furygan In&Out concept to create this «+» version, which can be used under or over your motorbike clothing. A new step in biker protection, this evolution of our abrasion-resistant airbag waistcoat, enhanced by a level 2 D30® back protector, redefines market standards. Still powered by intelligent, self-learning In&Motion technology, its protective performance has been enhanced by a new inflation pocket. Its featherweight, slimness and ultra-ventilation make it the benchmark for the market. Active protection that's as discreet as it is high-performance, so you'll forget you're wearing it on the road, trails and circuits.

PROTECTION

D30®, the highest level of protection. Certified to exceed the performance requirements of EN1621-2, level 2.

ERGONOMICS

In&Out Airbag Concept. The In&Out design allows you to wear your airbag under or over your certified motorbike clothing. EN17092 C U/O approval guarantees equivalent abrasion resistance of at least level A in the areas covered. **Ultra stretchable sides.** To allow a perfect fit thanks to its superior elasticity.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

Mesh 3D liner. 3D Mesh limits the creation of a thermal bridge. This ventilated insulation helps maintain a constant temperature inside the garment, whether it is hot or cold outside.

Furygan

X

in&motion
A I R B A G

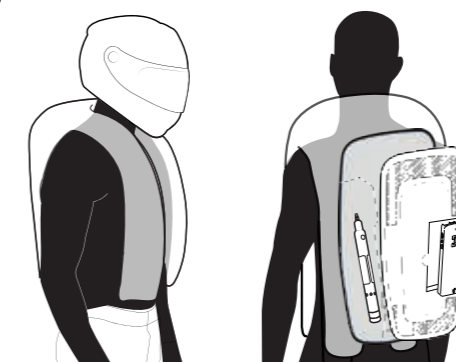

For more than 50 years, Furygan has been innovating, investing and designing the best protective clothing for motorised two-wheeler users.

In partnership with In&motion, French designer of airbag systems, Furygan is launching a new range of airbag vests, compatible with all motorcycle jackets, whatever their brand.

First tested by our riders on the Dakar and in MotoGP, In&Motion technology is now available in a range of high-performance, easy-to-wear products. Ultra-ventilated, light and comfortable, the Fury Airbag Evo and Fury Airbag Evolution+ are suitable for all motorcyclists, for everyday protection as well as at the highest level in competition.

To learn more about our partner scan the code.

30H

Up to 30 hours of riding autonomy.

0,06S

Detection + inflation in less than 0.06s.

3

3 custom detection modes: road, track, adventure.

5

Up to 5 inflations possible before the airbag cushion is replaced.

IN&BOX

MEMBERSHIP AND SUBSCRIPTION, HOW DOES IT WORK?

1. PURCHASE YOUR FURY AIRBAG from your favourite retailer.

2. ORDER THE IN&BOX on my.inemotion.com and take out a subscription.

Several options available:

REVOLUTION
In&box rental offer at €12/month or €120/year.

CLASSIQUE
Offer to purchase the In&box at €399.

TRACK and ADVENTURE
options at €8/month or €25/year each.

3. ACTIVATE THE IN&BOX by downloading the «My In&box» application, available on iOS and Android.

D30® AIRBAG EVOLUTION+ BACK PROTECTOR

SS24

● Orange / 7859-332

7 - 8 - 9

EN 1621-2

Level 2 back protection designed for the new generation of Furygan airbags. Developed for the Fury Airbag Evolution+, it fits perfectly and is positioned precisely on your back. Thanks to the combination of D30® and In&motion technologies, you now benefit from the highest and most reliable level of protection on the market. Ride with confidence on the road, track or off-road.

PROTECTION

D30®, the highest level of protection. Certified to exceed the performance requirements of EN1621-2, level 2.

ERGONOMICS

D30®. A very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

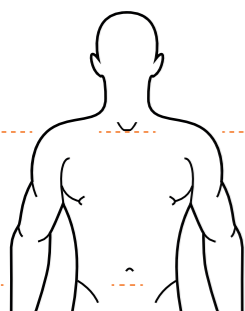

CLIMATE

Optimised design for airflow and breathability.

MATERIALS

D30®. The D30® range of materials includes over 30 different formulations. The polymer blends used in partnership with Furygan offer exceptional impact protection, comfort and flexibility.

TORSO LENGTH

SIZE	DIMENSION	TORSO LENGTH	FITS IN AIRBAG
7	250 X 455 mm	40 / 44 cm	XS - S
8	257 X 463 mm	44 / 48 cm	M - XL
9	279 X 492 mm	48 / 52 cm	2XL - 4XL

GOOD TO KNOW

- › Supplied as standard with the Fury Airbag Evolution+.
- › Compatible with all other makes incorporating the In&motion airbag system.

GOOD TO KNOW

- › Supplied with an airbag control nozzle.

AIRBAG EVO INFLATOR

SS24

● Incolore / 7959-10

SINGLE SIZE

Compatible with the new generation of airbags, the Fury Airbag Evo and Evolution+. This gas generator must be replaced each time the airbag is triggered. The post-inflation procedure is available via the «My In&box» mobile application.

JUNIOR EVO SUIT
6543 / page 19

FULL RIDE
6540 / page 21

OVERTAKE
6545 / page 22

KID EVO SUIT

● Black-red-white / 6544-102

6 - 12 years old

● Black-blue-white
6544-116

GOOD TO KNOW

- › The Kid suit has a back protector pocket that is compatible with the «Full Back» type level 2 D3O® back protector (size 6), available as an added option.
- › Developed in our racing department, cut in our factory in Nîmes.

The Combi Kid Evo suit has been optimised and developed just like the adult version, because all riders, no matter what their age, deserve the best.

PROTECTION

Back protector pocket. Designed to fit the Furygan D3O® «Full Back Fury» level 2 back protector.

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

D3O® shoulder, knee and elbow protectors. D3O® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Aramid fibres with padded reinforcements at the bottom. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

ERGONOMICS

Large stretch panels on the bust. To fit your body perfectly.

Gussets behind the shoulders. For increased comfort and mobility when you get into the riding position.

Comfort Zones. Stretchable material between the legs, above the knees and the kidneys for better fit and comfort.

Neoprene inserts at the collar and on the wrists. For increased comfort.

Knee and elbow sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

CLIMATE

Light and breathable fixed lining.

MATERIALS

Cow leather.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

 Cow Leather

Like our professional racers, the Full Ride leather suit is ready for a challenge. Protection, ergonomics - this new 'Airbag Ready' suit showcases all of our experience of racing, designed for those who cannot compromise on trust and performance. A real factory suit!

PROTECTION

Compatible with the airbag vests using the In&motion technology.
High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.
Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.
D30® shoulder, knee and elbow protectors. Level 2. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.
External shells on the shoulders and the knees.
Aramid fibres with padded reinforcements at the bottom. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

ERGONOMICS

Aerodynamic speed hump GP Specs. New aerodynamic speed hump, result of tests and wind tunnel studies with our World Superbike and MotoGP riders, to optimise drag and comfort in the speed position.
Removable liner.
Gussets behind the shoulders and on the elbows. For increased comfort and mobility when you get into the riding position.
Comfort Zones. Stretchable material between the legs, above the knees and the kidneys for better fit and comfort.
Neoprene inserts at the collar and on the wrists. For increased comfort.
Knee and elbow sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

CLIMATE

Selected perforated areas. For excellent air circulation during high-temperature rides, without compromising safety, the perforated areas have been optimised and carefully placed.

MATERIALS

Cow leather.
High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.
Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

OVERTAKE

● Black-red-white / 6545-102

46/36 - 58/48

GOOD TO KNOW

- › Developed in our racing department, cut in our factory in Nîmes.
- › New generation of knee sliders, developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.
- › New design of the wrists and stretch positions, based on the ergonomics developed for our world's best racers.

● Black-red-white
6545-102

● Black-white
6545-143

● Black-blue-white
6545-116

The Overtake is the result of three years of research dedicated to finding the perfect ergonomics for racing a motorcycle on track, no matter your ability, but always protected. Made with a new base that uses the same elements developed and tested by our MotoGP and WorldSBK riders, this new racing suit is ready to get started. Three, two, one... Go!

PROTECTION

Kevlar® reinforcements and double leather layers. At the hips, seat and forearms.

Knee protectors. Level 2.

Compatible with the airbag vests using the In&motion technology.

Chest protector pockets. Designed to fit the Furygan D30® «LNR» chest protectors.

D30® shoulder and elbow protectors. Level 2. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

External shells on the shoulders and the knees.

ERGONOMICS

Aerodynamic speed hump GP Specs. New aerodynamic speed hump, result of tests and wind tunnel studies with our World Superbike and MotoGP riders, to optimise drag and comfort in the speed position.

Removable liner.

Neoprene inserts at the collar and on the wrists. For increased comfort.

Morpho-stretch panels. to fit your body perfectly. The shape of the high tenacity bi-stretch inserts positioned on the arms is the result of our experiments in competition, facilitating movement and optimising comfort.

Knee and elbow sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

CLIMATE

Selected perforated areas. For excellent air circulation during high-temperature rides, without compromising safety, the perforated areas have been optimised and carefully placed.

MATERIALS

Cow leather.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Neoprene. A layered assembly of two soft-touch technical materials for a soft, warm and windproof outer shell. Unparalleled comfort.

Kevlar® fibre reinforcements.

› Each jacket is cut & checked thoroughly in our factory in Nîmes.

› The development of the sleeve has received special attention, to ensure comfort in all phases of riding.

The design of the Pro One is based on our developments in competition. It allows mobility without compromising on protection, thanks to high quality leather coupled with new stretch zones. A new standard in the world of motorsports.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Chest protector pockets. Designed to fit the Furygan D30® «LNR» chest protectors.

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

External shells on the shoulders.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

Waist adjuster tabs. For a precise adjustment to your body shape.

Gussets behind the shoulders and on the elbows. For increased comfort and mobility when you get into the riding position.

Trouser connecting zip. Compatible as standard, all Furygan trousers are equipped with connecting zips, in textile or leather. The zips are delivered complete, so that they can be sewn onto non-compatible products.

Neoprene inserts at the collar and on the wrists. For increased comfort.

Morpho-stretch panels. to fit your body perfectly. The shape of the high tenacity bi-stretch inserts positioned on the arms is the result of our experiments in competition, facilitating movement and optimising comfort.

CLIMATE

Removable thermal liner with aluminium inserts. The aluminium inserts on the chest retain heat and keep out the cold. They allow the liner to be both thin and efficient.

Light and breathable fixed lining.

MATERIALS

Cow leather.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Match with
Drack pant.

LUXIO KID

● Black-fluo yellow / 6444-1031

6 - 12 years old

GOOD TO KNOW

- › Also available in a women's version (Luxio Lady) and a men's version (Luxio Evo).
- › The outer pockets are secured with a zip.

Now available for children, the Luxio is the hoodie for the whole family. With Aramid fibre reinforcements and D30® protectors on the elbows and shoulders, it is equipped with the same technologies as the adult versions. The Luxio Kid will allow any child to accompany their parents on a motorbike with a trendy and ultra comfortable hoodie.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Aramid fibres with padded reinforcement at the shoulders and elbows. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Trouser belt connecting snap loops.

3 pockets. 2 outside, 1 inside.

CLIMATE

Padded fixed lining. Reinforces and protects against the coolness created by movement when riding a powered two-wheeler.

MATERIALS

Cotton.

Polyester.

Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

GOOD TO KNOW

- › A jacket dedicated to hot weather, which will let a maximum amount of air through during the summer season.

GOOD TO KNOW

- › A jacket dedicated to hot weather, which will let a maximum amount of air through during the summer season.
- › The cotton and polyamide outer fabric offers a soft and supple feel, for optimal comfort in all circumstances.

The TX Furyo Vented is a jacket designed to get through the summer in style, without ever overheating. Behind its apparent sobriety lies a strategic choice of materials, known for their flexibility, and a decisive technical work on the lining, allowing it to pass the homologation tests while remaining a model of comfort

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

GOOD TO KNOW

- › The Kenya was the first representative of a new generation of summer jackets. As light and protective as a mesh jacket, they were designed with the idea of going unnoticed in the urban jungle while adopting all the stylistic characteristics of a ready-to-wear product.

KENYA EVO 2

● Grey / 6476-9

S - 4XL

● Blue
6476-5

● Black
6476-1

The Kenya Evo 2 is a new direction in summer jackets. Inspired by bomber style jackets, it is ideal for those seeking a good-looking jacket that is light and easy to wear in the summer, but without the look of a vented motorcycle jacket.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

CLIMATE

Light and breathable fixed lining.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

Selected perforated areas. For excellent air circulation during high-temperature rides, without compromising safety, the perforated areas have been optimised and carefully placed.

Light and breathable fixed lining.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

Mesh.

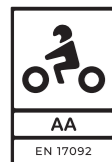

GOOD TO KNOW

- › Kevlar® fibre reinforced shoulder and elbow lining
- › The high tenacity polyester chosen offers style and durability thanks to its 3D knitting.

MARLON x KEVLAR®

● Khaki / 6477-610

S - 4XL

● Black 6477-1

The Marlon x Kevlar® over-shirt will accompany you in a sober and casual style wherever you go. A classic that doesn't forget the on-board technology thanks to its D30® protectors and internal reinforcements designed with Kevlar® fibres.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Padded reinforcements made with Kevlar® fibres at the elbows and shoulders. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

ERGONOMICS

5 pockets. 3 outside, and 2 inside.

Gussets behind the shoulders. For increased comfort and mobility when you get into the riding position.

CLIMATE

Light and breathable fixed lining.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

Kevlar® fibre reinforcements.

Furygan X Kevlar™

The association of our know-how as a designer of protective clothing for motorcyclists, with one of the most resistant fibres in the world, invented by DuPont, was obvious. The Kevlar® fibre, integrated into our textiles, defines a new standard for abrasion resistance and the mix between protection and comfort.

To learn more about our partner scan the code.

ABRASION AND PUNCTURE RESISTANCE

Kevlar® fibre, when incorporated into textiles, increases impact abrasion resistance, reduces wear, provides puncture protection and tear resistance.

5X

Kevlar® fibre is five times stronger than steel (weight for weight), providing lightweight strength without sacrificing performance or protection.

HEAT RESISTANCE AND DURABILITY

Kevlar® is a unique fibre capable of withstanding fire and heat, providing protection when you need it. Solid and robust. Kevlar® fibre retains its high performance qualities, such as tensile strength, even after repeated stressing and straining.

EXCLUSIVE SINGLE-LAYER MATERIALS

Furygan and Kevlar® have collaborated to develop, according to the particular specifications of motorcycle protective clothing, several innovative single-layer materials.

TO THE NEXT LEVEL OF PROTECTION

Like Furygan, for more than 50 years, Kevlar® has proven itself in the most extreme conditions.

This legendary durability and versatility make it the perfect technology partner to take our gear to the next level of protection.

The DuPont Oval Logo, DuPont™ and Kevlar® are trademarks or registered trademarks of affiliates of DuPont de Nemours, Inc. used under licence by Furygan.

WB08 VENTED+

SS24

● Black-white / 6482-143

S - 4XL

GOOD TO KNOW

- › The product's design reflects the brand's DNA, with a sober, stealthy design that's also sporty.
- › Wear the Humax® inner/outer liner as you please.

Its close-fitting cut and sober look make the WB08 Vented+ the choice of bikers who go for the essentials, but whose experience means they need to be prepared for unforeseen weather conditions. This summer jacket will let you feel every acceleration through its large ventilated zones, and its removable In&Out Humax® lining will keep you dry in bad weather.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Reflective inserts.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

In&Out Concept. The Furygan In&Out membrane can be worn over any certified motorbike garment. Its design makes it compatible with our «Vented+» range of jackets, into which it fits thanks to the zips already present.

Trouser belt connecting snap loops.

Waist and sleeve adjuster tabs. For a precise adjustment to your body shape.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

In&Out Humax® removable liner. Our In&Out Humax® removable membrane will keep you dry, while contributing to the clearance of moisture generated by your body. Performances : 10k/15k. Its In&Out design allows you to wear it under or over your motorcycling garment.

Light and breathable fixed lining.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

BALDO 3IN1

AW23

● Grey / 6470-9

S - 4XL

● Black
6470-1

GOOD TO KNOW

› Made from Softshell, this jacket offers a good fit while retaining the flexibility and elasticity that characterises this material.

Bet against the elements and face all situations thanks to the ingenuity and comfort of the Baldo. Modular at will and adaptable to your needs, this jacket is a must-have for the biker wardrobe in all seasons.

PROTECTION

Back protector pocket. Designed to fit the Furygan D30® «Full Back Fury» level 2 back protector.

Furygan Skin Protect lining. A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

D30® shoulder and elbow protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

4 pockets. 2 outside and 2 inside (wallet pockets).

Trouser belt connecting snap loops.

Waist and sleeve adjuster tabs. For a precise adjustment to your body shape.

CLIMATE

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

3in1 Humax®. Two liners and three configurations for maximum versatility, and a Warm, Waterproof and Windproof jacket when complete.

Light and breathable fixed lining.

MATERIALS

Mesh.

3 layer softshell fabric. This 3-layer laminated fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

36 - 50

GOOD TO KNOW

- › Now supplied with the latest generation of Furygan knee sliders, for an even more accomplished and aggressive look.
- › Each pair of trousers is cut & checked thoroughly in our factory in Nîmes.

The Bud Evo leather trousers are a major product of the Furygan range. In this latest evolution, featuring a striking new style, they prove again to have everything you can expect from a «must have» product and are perfect for any journey or track day on your bike.

PROTECTION

High quality leather. Constructed from leather selected for its strength and thickness, this product has been designed to offer high abrasion resistance and true durability.

Triple stitching. A sewing technique for creating extremely tear and abrasion resistant seams, where a fold of material protects the main thread.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Numerous stretch zones. Stretchable material between the legs, above the knees and the seat for better fit and comfort.

Knee sliders. Developed to reduce the weight and optimise the contact surface without degrading the longevity nor the feeling with the track surface.

Jacket connecting zip. Compatible as standard, all Furygan jackets are equipped with connecting zips, in textile or leather. The zips are delivered complete, so that they can be sewn onto non-compatible products.

CLIMATE

Raised back belt. For more comfort, warmth and protection on the kidneys when riding.

3 layer softshell fabric. This 3-layer laminated fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

GOOD TO KNOW

- › Available without removable thermal liner (Over Pant) or protectors (Lynx).

OVERCOLD

• Black / 6391-1

S - 3XL

Add an extra dimension to your standard rain pants. The Overcold trousers have a removable thermal lining and D30® protections, while still retaining the ability to be quickly put on in all circumstances.

PROTECTION

Reflective inserts.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Waist adjuster tabs. For a precise adjustment to your body shape.

Easy and quick put-over system. Thanks to the two-way zips along the entire length of the legs there is no need to remove the boots.

Adjustable hems. Thanks to an easy to fold scratch system there is no need to cut.

Adjustable knee protectors. 3 positions.

CLIMATE

Waterproof membrane.

Integral removable thermal liner. Lining covering all of the legs.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

- › Triple adjustment for perfect fit in length, calves and ankles.

MEN ALL SEASONS

PANTS

With its ultra-flexible materials and streamlined design, the Phenix is a comfortable and versatile pair of motorbike trousers. Its modern, tapered cut illustrates the particular care Motion Lab has taken to draw inspiration from sportswear standards, to achieve impeccable ergonomics. Wear the Phénix and you'll feel right at home, on all your urban adventures and beyond. You'll never want to leave.

PROTECTION

Reflective inserts.

D30® Ghost™ knee and hip protectors. Designed as fit and forget armour, the D30® Ghost™ is made with the revolutionary new Impact Print™ technology from D30® which allows for unrivalled freeform geometry and flexibility.

ERGONOMICS

Multiple adjuster tabs. To fit all body shapes and sizes.

4 outside pockets.

Easy fit opening. An adjustable opening at the bottom of the legs allows for an easy and precise fit with your boots.

Adjustable knee protectors. 3 positions.

Tapered cut. This cut starts out loose in the pelvis and narrows towards the bottom. Maintains the comfort that is essential for two-wheelers, while at the same time enhancing the silhouette.

Waist stretch. Allows for an optimal adjustment to your body shape.

CLIMATE

Waterproof and breathable Humax® membrane. Inserted in the heart of the garment, our Humax® membrane keeps you dry, while contributing to the clearance of moisture generated by your body.

MATERIALS

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

PANT APALACHES VENTED 2W1

● Black / 6428-1
S - 3XL

GOOD TO KNOW

- › Put together a great combo with the Apalaches or Apalaches Vented jackets.
- › Enjoy maximum airflow when temperatures rise, while maintaining versatility in mid-season.
- › Available in non-vented versions (men's and women's).

The Apalaches Vented 2W1 trousers are essentials for any adventure. Paired with the Apalaches Vented 2W1 jacket, you will benefit from excellent versatility combining waterproofing and ventilation, giving you the peace of mind to cover maximum miles in complete comfort.

PROTECTION

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Waist adjuster tabs. For a precise adjustment to your body shape.

Removable shoulder straps.

Numerous stretch zones. Stretchable material between the legs, above the knees and the seat for better fit and comfort.

Easy fit opening. An adjustable opening at the bottom of the legs allows for an easy and precise fit with your boots.

Jacket connecting zip. Compatible as standard, all Furygan jackets are equipped with connecting zips, in textile or leather. The zips are delivered complete, so that they can be sewn onto non-compatible products.

CLIMATE

2W1 liner. A thermal, waterproof, breathable and removable liner.

AFS Max. Air Flow System Max, an adjustable ventilation system for extended air flow in the garment.

Mesh. The Mesh, present in large panels and optimally placed, allows for increased airflow through the garment, and maximum breathability.

Selected perforated areas. For excellent air circulation during high-temperature rides, without compromising safety, the perforated areas have been optimised and carefully placed.

Light and breathable fixed lining.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

Mesh.

High tenacity bi-stretch inserts. A material that is both resistant and elastic, strategically placed to maintain ease and comfort during the movements necessary for proper handling of a powered two-wheeler.

Match with Apalaches Vented.

GOOD TO KNOW

› A classic in the range, with a straight, loose fit that makes it easy to put on boots.

D02 STRETCH

● Denim blue / 6945-561

36 - 50

● Black 6945-1

With D30® hips protectors and more of a street style, the D02 takes all the renowned qualities of the 01 jeans, including its stretchable denim, but pushes the design one step further.

PROTECTION

Aramid fibres with padded reinforcements at the bottom, hips and knees. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Adjustable knee protectors. 3 positions.

Straight cut. The straight cut is designed to be comfortable in all circumstances, and to fit most body types. The cut is straight on the entire leg without tightening at the bottom, which facilitates the insertion of boots.

Stretchable material. For maximum ease of movement on your bike, and in everyday life.

5 outside pockets.

CLIMATE

Denim. Denim is a comfortable fabric in summer, which lets the air pass through without exposing your legs. Furygan denim jeans have been enhanced with different protection technologies to give you enhanced performances in case of a fall.

MATERIALS

Stretchable cotton denim.

Aramid fibres. Lightweight and heat resistant, Aramid fibre strengthens the materials it is used with against abrasion, and slows down heat transfer to the skin.

JEAN D11 X KEVLAR®

● Grey / 6326-9

36 - 50

● Black 6326-1

● Denim blue 6326-561

The Furygan D11 jeans offers specific protection for motorcyclists, but wear them off the bike and no-one would ever know. They offer everything you need as a rider, but are disguised as a pair of everyday fashion jeans.

PROTECTION

Padded reinforcements made with Kevlar® fibres at the bottom. A fabric that remains comfortable - thanks to the cotton - which slows down heat transfer during abrasion. Another benefit is that it increases the overall abrasion resistancy of other materials it is used with.

D30® knee and hip protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Waterproof and breathable membrane.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

PU synthetic leather.

Rubber. The rubber parts provide good grip thanks to a unique anti-slip coating.

Synthetic microfibre. Thinner than a silk thread, the water-repellent synthetic fibre from which this fabric is made offers unparalleled comfort, ventilation and durability.

Airmesh. Three-dimensional synthetic fabric with excellent airflow properties, good cushioning and quick drying capabilities.

Waterproof and Breathable

SS24

GOOD TO KNOW

- › Short knitted summer glove with flexible metacarpal reinforcement and finger reinforcement.
- › Leather palm.
- › Extremely flexible knitted upper hand to prevent hand fatigue
- › Stretch inserts for ultimate grip

The Jack is a glove made from particularly supple materials and a flexible honeycomb metacarpal protection. This combination allows you to maintain exceptional dexterity on the handlebars, ideal for being responsive in urban traffic. The knitted fabric - technical and modern - reduces fatigue, lets air through and keeps your hands cool.

PROTECTION

- 100% leather palms.
- Palms and fingers reinforcements.
- Metacarpal shell protectors.
- Palms reinforcements with high tenacity microfibres.

ERGONOMICS

- Precise wrist tightening.** For gloves that always fit perfectly.
- Stretches on fingers.** For optimum mobility when manipulating the controls.
- Elastic material between the fingers.** Thanks to this soft and elastic material placed between your fingers, the glove fits your hands perfectly.

CLIMATE

Placed perforations and ventilation. Openings and perforations have been placed to optimise airflow through the glove, without compromising safety.

Elastic material between the fingers. Enjoy superior breathability thanks to the elastane inserts between the fingers, allowing air to enter and circulate through the gloves.

MATERIALS

High tenacity Polyester. Polyester with a weight of 600 deniers or more (thin tights weigh about 10 deniers). With at least one coating to hold the fibres together, PHT offers greater resistance than standard polyester.

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyurethane.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Vented

Goat Leather

GOOD TO KNOW

› Equipped with a mid-length cuff, allowing superior support and the insertion of a reinforcement to protect the head of the ulna.

VOLT

• Black-red / 4494-108

S - 3XL

• Black-white 4494-143

• Black-black 4494-117

It's difficult not to be intrigued by the Volt and its dynamic colours along with finishing touches inspired by racing gloves. For the perfect combination of performance and comfort even when the temperature rises, the Volt is designed for you.

PROTECTION

100% leather palms.
Palms and fingers reinforcements.
Metacarpal shell protectors.

ERGONOMICS

Materials, a hybrid mix. The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.

Pre-shaped.

Precise wrist tightening. For gloves that always fit perfectly.

Stretches on fingers. For optimum mobility when manipulating the controls.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

Thanks to our commitment to racing and the data we've gathered on track, we've developed the STYG range. The STYG15 incorporates the exceptional ergonomics of the STYG20, the top-of-the-range glove used by the world's best racers, to offer a high-performance track glove that is affordable to as many people as possible.

PROTECTION

100% leather palms.

Palms and fingers reinforcements.

Metacarpal shell protectors.

Palms sliders. Reinforces the glove in an area prone to impact and abrasion, while allowing the hand to slide on the ground, reducing the risk of scaphoid fracture or damage to the arms and shoulders.

Anti separation link. Reduces the risk of injury to the little finger by crushing or tearing.

Kevlar® ripstop reinforcements. Covered with a layer of interwoven yarns incorporating Kevlar®, these pads offer superior tear and adbrasion resistance compared to traditional reinforcement.

ERGONOMICS

Double tightening cuff. Fit your gloves perfectly to your wrists as well as to your jacket, to ensure comfort and safety on every trip.

Finger stitch seams positioned on the outside. Eliminates any potential discomfort, for better comfort and a perfect feel on the controls.

Pre-shaped.

Stretches on fingers. For optimum mobility when manipulating the controls.

Grip insert. A printed silicon part provides a better grip, more safety and greater comfort when riding.

STYG20 X KEVLAR®

● Black-White-Red / 4566-169

S - 3XL

GOOD TO KNOW

- › The edge of the hand, the palm and the little finger, have been the subject of particular care. Particularly exposed, the reinforcement of this area has been designed in one piece, reinforced with Kevlar® fibres, and designed for optimal coverage, while never hindering the mobility of the hand.
- › The mobility of the index and middle finger is essential for precise riding and has been optimised.
- › With the D3O® racing back protector and the D3O® racing chest protector, the Styg20 X Kevlar® are the only products used by our riders in competition and are available in the Furygan catalogue.

● Black-White-Red
4566-169

● Black-white
4566-143

● White-black
4566-214

● Black-fluo yellow-white
4566-1048

After 18 months of development in our racing department and 6 months of testing in race conditions in the hands of our most demanding riders, the Styg20 X Kevlar® are ready. Now it's your turn to be Johann Zarco. Put this new generation of ultra-technical gloves to the test, designed to become the new reference in the segment, both in terms of protection and feel.

PROTECTION

100% leather palms.

Palms and fingers reinforcements.

Metacarpal shell protectors.

Palms sliders. Reinforces the glove in an area prone to impact and abrasion, while allowing the hand to slide on the ground, reducing the risk of scaphoid fracture or damage to the arms and shoulders.

Anti separation link. Reduces the risk of injury to the little finger by crushing or tearing.

Multiple Kevlar® reinforcements and doubled leather layers. On the back, side and palm of the hand, areas particularly exposed to abrasion during a crash.

Kevlar® ripstop reinforcements. Covered with a layer of interwoven yarns incorporating Kevlar®, these pads offer superior tear and adbrasion resistance compared to traditional reinforcement.

ERGONOMICS

Ergonomics derived from Racing. Design based on the ergonomics developed for our world's best racers.

Double tightening cuff. Fit your gloves perfectly to your wrists as well as to your jacket, to ensure comfort and safety on every trip.

Finger stitch seams positioned on the outside. Eliminates any potential discomfort, for better comfort and a perfect feel on the controls.

Pre-shaped.

Grip insert. A printed silicon part provides a better grip, more safety and greater comfort when riding.

Fit control. An elastic cuff adjustment system allows for a precise fit with each use.

CLIMATE

AFS ventilation system. Products that include the label «Air Flow System» have been designed to create and channel the flow of air into a garment or glove in order to provide effective ventilation when temperatures rise.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

GOOD TO KNOW

› PrimaLoft® Gold on palm and top of hand.

OSLO D30® PRIMALOFT®

AW23

● Black / 4593-1

S - 3XL

Heir to the best performing gloves in our winter range, the Oslo combines Furygan technical expertise with premium PrimaLoft® Gold technology. A wadding whose efficiency pushes the limits even further, to allow you to defy the extreme winter conditions in complete serenity.

PROTECTION

100% leather palms.

D30® metacarpal protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Palms reinforcements with high tenacity microfibres.

ERGONOMICS

Materials, a hybrid mix. The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.

Precise wrist tightening. For gloves that always fit perfectly.

Stretches on fingers. For optimum mobility when manipulating the controls.

Grip insert. A printed silicon part provides a better grip, more safety and greater comfort when riding.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

Dual Lining. Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.

ColdMaster®. For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

PrimaLoft® Gold padding. The PrimaLoft® family of insulation products is widely regarded as the best performing on the market, offering comfort and protection in a variety of climatic conditions. PrimaLoft® Gold is the version for the most extreme conditions.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Ripstop. Widely used in the military, aerospace, sports and fashion industries for years, the reinforced mesh of this fabric is designed to ensure strength and prevent the spread of a tear.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Furygan X PRIMALOFT®

Furygan has developed a technological partnership with PrimaLoft®, widely considered to be the best performing synthetic wadding on the market.

PrimaLoft® is comfortable and keeps bikers warm and dry in variable weather conditions.

Furygan has expanded its range to include two insulations that meet specific requirements: PrimaLoft® Black, which contains 100% recycled materials, and PrimaLoft® Gold, designed for the most extreme conditions.

To learn more about our partner scan the code.

THERMAL INSULATION.

PrimaLoft® is made from ultra-fine fibres designed to trap heat. The immediate effect is to keep the body thermoregulated and at 100% of its capacity - from winter to spring, from the coldest destinations to home.

HYDROPHOBIC

PrimaLoft® wadding is created with intrinsically hydrophobic fibres that repel water. PrimaLoft® keeps you dry and will also dry very quickly in the event of prolonged exposure.

SOFT AND COMFORTABLE

PrimaLoft fibres are thinner than a human hair, making them incredibly soft. They offer an unprecedented feeling of comfort for a perfect ride in all conditions.

DURABLE

PrimaLoft® engineers develop materials designed to survive the rigours of military use. Coupled with resistance tests carried out by the Furygan Motion Lab, PrimaLoft®-equipped products are made to withstand the elements and the test of time.

RESPONSIBLE

PrimaLoft® insulation in the Furygan range is Bluesign®, GRS (Global Recycled Standard) and OEKO-TEX standard 100 certified.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

Thindown® Pure White Duck down padding. Natural and responsible down padding (RDS), guaranteeing thin but highly effective insulation. Its design offers consistent performance over time, preventing cold spots from forming through compressions and displacements.

Dual Lining. Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.

ColdMaster®. For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyester.

Polyurethane.

Duck down. 100% natural, recycled, recyclable and RDS (Responsible Down Standard) certified. This patented and exclusive down wadding is eco-friendly in its design and guaranteed to involve no animal abuse during its manufacture.

Waterproof and Breathable

Goat Leather

FURYTECH

Furygan X THINDOWN®

Furygan has teamed up with Thindown®, a revolutionary technology, to take protection against the cold even further.

Proud to bring this innovation to motorbike equipment for the first time, Furygan, in partnership with Thindown®, has selected a natural wadding created from the finest parts of down, the best thermal insulator available.

Its ultra-fine design provides exceptional thermal performance, thanks to the specific architecture of the down, which traps air, remains breathable and maintains an ideal body temperature. Its effect is constant, preventing the formation of cold spots through compression or displacement.

To learn more about our partner scan the code.

1ST.

Thindown® is the world's first down wadding.

2X. BETTER THERMAL INSULATION

Independent laboratory tests have proven that Thindown® down is 2x warmer than standard down, and 4x warmer than synthetic down.

NATURAL AND ECO-RESPONSIBLE

Thindown® is natural and eco-sustainable, made exclusively with traced down, RDS certified or post-consumer recycled, GRS (Global Recycled Standard) certified.

THINDOWN® IS RDS CERTIFIED
(Responsible Down Standard)

This 100% natural down wadding made from virgin down is guaranteed to be ethically sourced.

THINDOWN® is 100% traceable and environmentally friendly.

THINDOWN® is certified OEKO-TEX class 1. The wadding is certified free from harmful or toxic substances, and guarantees effective protection for bikers of all ages.

THINDOWN® is sourced exclusively from ecological farms, guaranteed free from animal abuse.

THINDOWN® is a by-product of the food industry, making it a natural product with low environmental impact.

ACTIVE MATERIAL

Thindown® wadding is active thermal insulation. It is activated by body movements and generates heat, unlike polyester which is a passive thermal insulator.

WITHOUT HEAT LOSS

Unlike traditional down, which needs containment seams to hold it in place, creating thermal bridges, Thindown® is a continuous wadding with no cold spots.

ENHANCED SENSATIONS

Thindown® offers all the natural benefits of down in an ultra-thin thickness, making it possible to reduce the thickness of the most technical motorbike equipment, and achieve a fit and sensitivity previously impossible with winter products.

FLEGERE

● Anthracite-Pearl-Red / 4569-993

S - 3XL

● Black-red
4569-108

GOOD TO KNOW

› The inspiration for this product comes from the mountains, a universe that can be found on its metacarpal protective shell with an exclusive geometric pattern, or in its name taken from a slope of the Aiguilles Rouges, near Mont-Blanc.

Robust, protective, yet flexible, waterproof and comfortable, the Flégère is a glove that will not shy away from any adventure, even in harsh and humid climates. There's no doubt about it, you can count on it in case of a hard blow.

PROTECTION

- 100% leather palms.
- Palms and fingers reinforcements.
- Metacarpal shell protectors.

ERGONOMICS

- Materials, a hybrid mix.** The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.
- Precise wrist tightening.** For gloves that always fit perfectly.
- Stretches on fingers.** For optimum mobility when manipulating the controls.
- Furygan Sensitive Science insert.** An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

- Waterproof and breathable insert.**
- Dual Lining.** Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.

MATERIALS

- Micropolar lining.** Appreciated for its fluffy feel that provides exceptional warmth, the brushed texture of the fleece lining offers exceptional comfort when temperatures drop.
- Polyamide.** Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

HEAT GENESIS

● Black / 4548-1
S - 3XL

GOOD TO KNOW

- › With the «MyFury Connect» application, the Furygan Heat X Genesis have been thought through to the end.
- › Available in a Heat X Kevlar® and Heat X Kevlar® Lady version, for superior protection, as well as an ever more intense and customisable heating experience.

Scan to watch the product video.

First representative of the new generation of Furygan heated gloves, the Heat Genesis offers the main technologies of a Furygan textile winter glove, enriched with a high quality heating module. Circulating on the top of the hand and fingers, to return under the first phalanx, the gloves guarantee a good coverage of all the sensitive areas, and are controlled by a new "1-click mode" system using just one, simple button to control both gloves.

PROTECTION

Metacarpal shell protectors.

Palms reinforcements with high tenacity microfibres.

ERGONOMICS

Double tightening cuff. Fit your gloves perfectly to your wrists as well as to your jacket, to ensure comfort and safety on every trip.

1-click mode. To control both gloves via a single ergonomic and illuminated button, easily operated with one hand while riding.

Heat indicator. readable at a glance via a configurable indicator light.

MyFury Connect compatible. Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for IOS and Android.

12V compatible. Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.

My Heat mode. Customise your heating modes in intensity, number (up to 5), and colours thanks to the free MyFury Connect app.

Timer. Preset your gloves (through the free MyFury Connect app) to automatically preheat 5 minutes before your departure time and optimise their performance.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

Dual Lining. Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.

HEAT X KEVLAR®

● Black / 4550-1
S - 3XL

GOOD TO KNOW

- › With a unique light signature, and a number of features that can be controlled and customised with the «MyFury Connect» application, the Furygan Heat X Kevlar® has been meticulously thought through to the end.
- › The programming of the Heat X Kevlar® has been optimised to obtain an optimal heating / autonomy ratio.

Scan to watch the product video.

Equipped with an innovative and unique heating system, developed in partnership with Kevlar® engineers, the latest Furygan heated gloves offer a new experience. At the heart of this product, a fabric incorporating Kevlar® fibres captures and evenly distributes heat while protecting the hand. Heat is generated by a double wire running from the back of the hand to the fingertips, and its heat transfer is spread by the Kevlar® as well as a touch of carbon - a smart conductor - present in the weave. This energy is captured by Furygan in a glove made of leather and softshell material, designed to retain heat as close as possible to your skin, delaying humidity thanks to the 37.5®, and protecting your hands in case of a hard blow.

PROTECTION

100% leather palms.

D30® metacarpal protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Palms reinforcements with high tenacity microfibres.

ERGONOMICS

1-click mode. To control both gloves via a single ergonomic and illuminated button, easily operated with one hand while riding.

Auto-regulation mode. Thanks to a temperature sensor, the Heat X Kevlar® can regulate the temperature of your choice, according to the instructions set in the «MyFury Connect» application.

Smart Move mode. Save your batteries by selecting one of the three automatic start and standby modes that will work in synchronisation with the accelerometer included in your gloves.

Heat indicator. readable at a glance via a configurable indicator light.

MyFury Connect compatible. Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for iOS and Android.

12V compatible. Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.

My Heat mode. Customise your heating modes in intensity, number (up to 5), and colours thanks to the free MyFury Connect app.

Timer. Preset your gloves (through the free MyFury Connect app) to automatically preheat 5 minutes before your departure time and optimise their performance.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

Dual Lining. Thanks to materials chosen for their insulation and breathability properties, the back and palm of the hand are differentiated to better respond to the specificities of riding in cold weather, without affecting the feel of the handlebars.

37.5®. The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

ColdMaster®. For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

Unique and exclusive heating system. Double wire heating system embedded in a weave based on Kevlar® and carbon fibres, which conducts, channels and then homogenises heat diffusion on the whole glove's surface.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

3 layer softshell fabric. This 3-layer laminated fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

The Jet D30® is evolving by keeping the softness and lightness of the previous models, and integrating the D30® technology for metacarpal protection, without a price change - who said bargain?

PROTECTION

100% leather palms.

Palms reinforcements.

D30® metacarpal protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

ERGONOMICS

Materials, a hybrid mix. The material mix provides a superior stage of comfort, while offering a high level of protection on the exposed zones during a crash.

Elastic material between the fingers. Thanks to this soft and elastic material placed between your fingers, the glove fits your hands perfectly.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Elastic material between the fingers. Enjoy superior breathability thanks to the elastane inserts between the fingers, allowing air to enter and circulate through the gloves.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Vented

Goat Leather

GOOD TO KNOW

- › A classic in the range, popular with riders since 2014.
- › The palm reinforcement is made of goat leather, for increased resistance in this stressed area.

TD12 LADY

• Black / 4394-1

XS - XL

The TD12 Lady is a summer glove offering brilliant ventilation to keep your hands dry, even during the hottest days, and although lightweight, it definitely does not neglect the style, neither the required standards of protection for a motorcycle glove.

PROTECTION

Palms and fingers reinforcements.
Metacarpal shell protectors.

ERGONOMICS

Precise wrist tightening. For gloves that always fit perfectly.
Stretches on fingers. For optimum mobility when manipulating the controls.
Grip insert. A printed silicon part provides a better grip, more safety and greater comfort when riding.
Elastic material between the fingers. Thanks to this soft and elastic material placed between your fingers, the glove fits your hands perfectly.

CLIMATE

Elastic material between the fingers. Enjoy superior breathability thanks to the elastane inserts between the fingers, allowing air to enter and circulate through the gloves.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.
Polyester.
Airmesh. Three-dimensional synthetic fabric with excellent airflow properties, good cushioning and quick drying capabilities.
Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

Vented

GOOD TO KNOW

- › A summer leather glove whose flexibility, ventilation and comfort will make it an essential companion in the summer months for those looking for an ideal compromise.
- › Also available in a women's version and an all-season version.

TD21 LADY VENTED

• Black / 4490-1

XS - XL

Constructed from perforated leather making it soft and light, the TD21 is a glove that keeps your hands cool on warmer days without compromising on protection.

PROTECTION

100% leather palms.
Palms and fingers reinforcements.
Metacarpal shell protectors.

ERGONOMICS

Pre-shaped.
Precise wrist tightening. For gloves that always fit perfectly.
Stretches on fingers. For optimum mobility when manipulating the controls.
Elastic material between the fingers. Thanks to this soft and elastic material placed between your fingers, the glove fits your hands perfectly.
Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

HEAT X KEVLAR® LADY

● Black / 4549-1
XS - XL

Furygan Heating

GOOD TO KNOW

- › With a unique light signature, and a number of features that can be controlled and customised with the «MyFury Connect» application, the Furygan Heat X Kevlar® has been meticulously thought-out to the end.
- › The programming of the Heat X Kevlar® has been optimised to obtain an optimal heating / autonomy ratio.

Scan to watch the product video.

Equipped with an innovative and unique heating system, developed in partnership with Kevlar® engineers, the latest Furygan heated gloves offer a new experience. At the heart of this product, a fabric incorporating Kevlar® fibres captures and evenly distributes heat while protecting the hand. Heat is generated by a double wire running from the back of the hand to the fingertips, and its heat transfer is spread by the Kevlar® as well as a touch of carbon - a smart conductor - present in the weave. This energy is captured by Furygan in a glove made of leather and softshell material, designed to retain heat as close as possible to your skin, delaying humidity thanks to the 37.5®, and protecting your hands in case of a hard blow.

PROTECTION

100% leather palms.

D30® metacarpal protectors. D30® is a very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Palms reinforcements with high tenacity microfibres.

ERGONOMICS

1-click mode. To control both gloves via a single ergonomic and illuminated button, easily operated with one hand while riding.

Auto-regulation mode. Thanks to a temperature sensor, the Heat X Kevlar® can regulate the temperature of your choice, according to the instructions set in the «MyFury Connect» application.

Smart Move mode. Save your batteries by selecting one of the three automatic start and standby modes that will work in synchronisation with the accelerometer included in your gloves.

Heat indicator. readable at a glance via a configurable indicator light.

MyFury Connect compatible. Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for iOS and Android.

12V compatible. Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.

My Heat mode. Customise your heating modes in intensity, number (up to 5), and colours thanks to the free MyFury Connect app.

Timer. Preset your gloves (through the free MyFury Connect app) to automatically preheat 5 minutes before your departure time and optimise their performance.

Furygan Sensitive Science insert. An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

CLIMATE

Waterproof and breathable insert.

37.5®. The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

ColdMaster®. For the warmest clothing designed for motorcycling. ColdMaster® is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

Unique and exclusive heating system. Double wire heating system embedded in a weave based on Kevlar® and carbon fibres, which conducts, channels and then homogenises heat diffusion on the whole glove's surface.

MATERIALS

Goat leather. Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Polyamide. Known for its resistance to abrasion and tearing, polyamide is the material of choice for protective clothing for motorbike users.

3 layer softshell fabric. This 3-layer laminated fabric is waterproof and windproof, without compromising on comfort. Flexible and breathable, it promotes freedom of movement without compromising the rider's protection and while preserving body heat in all conditions.

Test the 37.5® moisture regulation technology, used in several models of Furygan gloves, while showing your love of motorcycling even on your socks!

ERGONOMICS

Ergonomical design. For a garment that fits perfectly, the selection of materials as well as the assembly techniques and the layout of the cut-outs have been designed to provide maximum performance without ever creating any discomfort when worn.

Quick drying material. Designed with materials with a high capacity to dry quickly, to avoid uncomfortable residual moisture sensations.

CLIMATE

37.5®. The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

GOOD TO KNOW

- › Innovative design and technology in a range of products that are 100% Made in France.
- › Ultra-fast drying to quickly wick away moisture and stay dry in intensive sports conditions or after washing.
- › Combine with Active Pant 37.5® for optimum performance.

Furygan X

Thanks to the Furygan X 37.5® partnership, we now offer the best in terms of moisture wicking and dry keeping in our motorcycle clothing.

Motorcyclists who have chosen a Furygan X 37.5® product are now ready to face any climatic situation in optimal riding comfort and whatever the level of intensity of the practice.

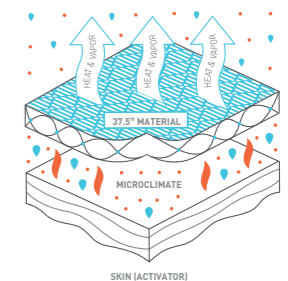

To learn more about our partner scan the code.

AN INNOVATIVE, ACTIVE AND NATURAL TECHNOLOGY

37.5® is a thermoregulation technology that interacts with the body and wicks away moisture. It is made up of natural active particles from volcanic rocks. 37.5® technology preserves your comfort by helping your body stabilize your humidity level close to your skin at 37.5%.

A CONSTANT TEMPERATURE

The 37.5® active particles, permanently integrated into the weave, give our fabrics an exceptional ability to capture and evacuate moisture by acting with the body like a natural thermostat. 37.5® technology helps warm you up when you're cold and cool you down when it's hot.

PERFORMANCE IN ALL CIRCUMSTANCES

37.5® natural thermoregulating active particles keep the body dry and at a comfortable temperature whatever the climate and activity level. Furygan gear with 37.5® technology has been proven to decrease the rate of core temperature buildup, increasing athletic performance by up to 26%.

SUSTAINABLE EFFICIENCY

37.5® is a technology whose effectiveness is stable over time, despite washing. No chemical treatment is done, it is natural particles mixed in the base which is used to manufacture the threads which will give rise to our wadding and linings. 37.5® technology is patented and effective throughout the life of the product.

For bikers who want to optimise their riding experience. The 37.5® keeps the body dry whatever the climate and level of intensity. The compression zones and seamless design provide perfect support and eliminate chafing. A must-have as soon as the summer heat sets in.

ERGONOMICS

Seamless. Seamless design for a perfectly smooth, snug fit all over the body. This process guarantees superior comfort, without discomfort or skin irritation from rubbing during intense activity.

Compression zones. The design includes zones with different levels of elasticity. The benefits are a sheathing effect and support for the body in all movements.

Ergonomics derived from Racing. Design based on the ergonomics developed for our world's best racers.

Ergonomical design. For a garment that fits perfectly, the selection of materials as well as the assembly techniques and the layout of the cut-outs have been designed to provide maximum performance without ever creating any discomfort when worn.

Quick drying material. Designed with materials with a high capacity to dry quickly, to avoid uncomfortable residual moisture sensations.

CLIMATE

37.5®. The active 37.5® particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

D3O®

Furygan and D3O® have worked hand in hand for over 15 years to provide riders with the best impact protection, in the best motorcycle apparel.

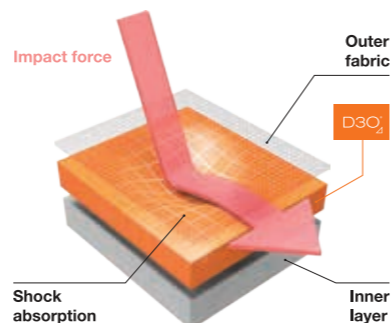

The combination of cutting-edge technology, our passion, and a veritable “made for bikers” approach coupled with our experience and our know-how. For your protection.

To learn more about our partner scan the code.

THE WORLD'S MOST ADVANCED IMPACT PROTECTION

A very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

SOFT AND FLEXIBLE FOR UNMATCHED COMFORT

The D3O® range of materials includes over 30 different formulations. The polymer blends used in partnership with Furygan offer exceptional impact protection, comfort and flexibility.

THIN AND LIGHT, THE BEST THICKNESS / PROTECTION RATIO ON THE MARKET

Recognised by professionals and enthusiasts, D3O® is the number one choice in terms of impact protection, offering comfort, flexibility and ergonomics whether on or off-road.

D3O®. A PATENTED HIGH TECHNOLOGY PRODUCT

Furygan and D3O® maintain an exclusive partnership to offer a wide range of certified level 1 and 2 protections including protectors for the elbows, shoulders, back, metacarpals, malleolus, hips and knees.

Designed as fit and forget armour, the D3O® Ghost™ is made with the revolutionary new Impact Print™ technology from D3O which allows for unrivalled freeform geometry and flexibility.

Find the complete range of D3O® Ghost™ protectors in the protections tab of this catalogue.

EN 1621-2

GOOD TO KNOW

- › Supplied as standard with the Furygan airbag vest.
- › Compatible with all vests that integrate the In&motion airbag technology.

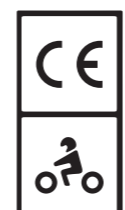

D30® AIRBAG EVOLUTION+ BACK PROTECTOR

SS24

● Orange / 7859-332

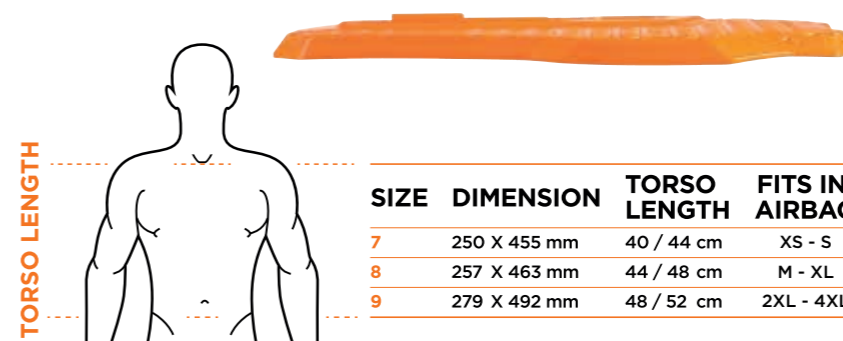

7 - 8 - 9

EN 1621-2

GOOD TO KNOW

- › Supplied as standard with the Fury Airbag Evolution+.
- › Compatible with all other makes incorporating the In&motion airbag system.

This back protector combines market-leading impact protection from D30®, with the airbag technology from In&motion. With a low profile and highly ventilated geometry, the new back protector is CE Level 2 certified and uses the latest features developed by D30® to provide superior comfort and breathability alongside protection. Together, the two technologies provide users with the highest, most reliable level of protection on the market, keeping them protected across multiple types of impact and providing the reassurance needed when hitting the road, track or trail.

PROTECTION

D30®, the highest level of protection. Certified to exceed the performance requirements of EN1621-2, level 2.

Compatible with the airbag vests using the In&motion technology.

CLIMATE

Optimised design for airflow and breathability.

MATERIALS

D30®. The D30® range of materials includes over 30 different formulations. The polymer blends used in partnership with Furygan offer exceptional impact protection, comfort and flexibility.

ERGONOMICS

D30®. A very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

Level 2 back protection designed for the new generation of Furygan airbags. Developed for the Fury Airbag Evolution+, it fits perfectly and is positioned precisely on your back. Thanks to the combination of D30® and In&motion technologies, you now benefit from the highest and most reliable level of protection on the market. Ride with confidence on the road, track or off-road.

PROTECTION

D30®, the highest level of protection. Certified to exceed the performance requirements of EN1621-2, level 2.

GLOSSARY

D3O₂

D3O[®], the highest level of protection.

A very soft material where molecules lock in the event of an impact to absorb kinetic energy. This technology makes it possible to create soft, ergonomic and top performing protectors for more security and comfort.

D3O[®] Ghost™

Designed as fit and forget armour, the D3O[®] Ghost™ is made with the revolutionary new Impact Print™ technology from D3O[®] which allows for unrivalled freeform geometry and flexibility.

D3O[®], Level 2.

Certified to exceed the performance requirements of EN1621-2, level 2.

Chest protector pockets.

Designed to fit the Furygan D3O[®] «LNR» chest protectors.

Back protector pocket.

Designed to fit the Furygan D3O[®] «Full Back Fury» level 2 back protector.

Kevlar[®].

Tough external material built in partnership with Kevlar[®].

In&Motion[®]

Furygan's technological partner for the airbag system and accessories. In&Motion develops the algorithm integrated into the casing of all Fury Airbags.

Furygan Skin Protect lining.

A three-material design, studied to strategically optimise the resistance of the areas most stressed during a fall, while preserving comfort.

Reflective inserts.

Retro-reflective inserts to improve visibility in the dark.

37.5[®].

The active 37.5[®] particles, permanently integrated into the weave, give our fabrics an extraordinary capacity to capture and clear humidity by acting with the body like a natural thermostat.

Thindown[®] Pure White Duck down padding.

Natural and responsible down padding (RDS), guaranteeing thin but highly effective insulation. Its design offers consistent performance over time, preventing cold spots from forming through compressions and displacements.

PrimaLoft[®] padding.

The PrimaLoft[®] family of insulation products is widely regarded as the best performing on the market, offering comfort and protection in a variety of climatic conditions.

Waterproof and breathable Humax[®] membrane.

Inserted in the heart of the garment, our Humax[®] membrane keeps you dry, while contributing to the clearance of moisture generated by your body.

ColdMaster[®].

For the warmest clothing designed for motorcycling. ColdMaster[®] is the Furygan label for garments equipped with our best technologies and offering the highest performance against the cold.

2W1 liner.

A thermal, waterproof, breathable and removable liner.

High tenacity 3 layer laminated polyester.

Waterproof membrane.

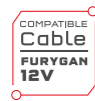

Breathable membrane.

MyFury Connect compatible.

Access to an easy-to-use dashboard, program, control, refine and optimise your gloves thanks to the MyFury Connect app for IOS and Android.

12V compatible.

Thanks to the Furygan optional cable, you can connect your gloves to the 12V battery of your motorbike and boost your autonomy.

Furygan Sensitive Science insert.

An insert specifically developed to allow touch screen use (GPS, smartphones) without removing your gloves.

External USB port.

Used to power electronic equipment via an externally accessible USB port.

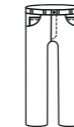

4-way stretch.

For maximum ease of movement on your bike, and in everyday life.

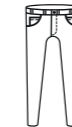

In&Out Concept.

The Furygan In&Out membrane can be worn over any certified motorbike garment. Its design makes it compatible with our «Vented+» range of jackets, into which it fits thanks to the zips already present.

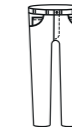

Straight cut.

The straight cut is designed to be comfortable in all circumstances, and to fit most body types. The cut is straight on the entire leg without tightening at the bottom, which facilitates the insertion of boots.

Slim cut.

A close-fitting cut that remains comfortable thanks to the stretch in the denim. It fits the hips, moulds to the thighs and becomes narrower at the ankles.

Tapered cut.

This cut starts out loose in the pelvis and narrows towards the bottom. Maintains the comfort that is essential for two-wheelers, while at the same time enhancing the silhouette.

Goat leather.

Combining suppleness and resistance, goat leather provides first-rate protection, while offering an unrivalled feel for the handlebars.

Cow leather.

100% Buffalo leather.

A noble leather with an incomparable softness and feel.

PFC free.

Water repellent treated and PFC free. For a resistant, yet waterproof, light and comfortable jacket.

Johann Zarco #5.

Official merchandising, designed and conceived in collaboration with Johann and his team.

Developed for children.

Ergonomically designed garment specifically for younger children.
